

# AI Literacy Through Culture & Art

*Real-world experiments to make AI accessible, understandable, and develop active users*

**Isabelle GALY**

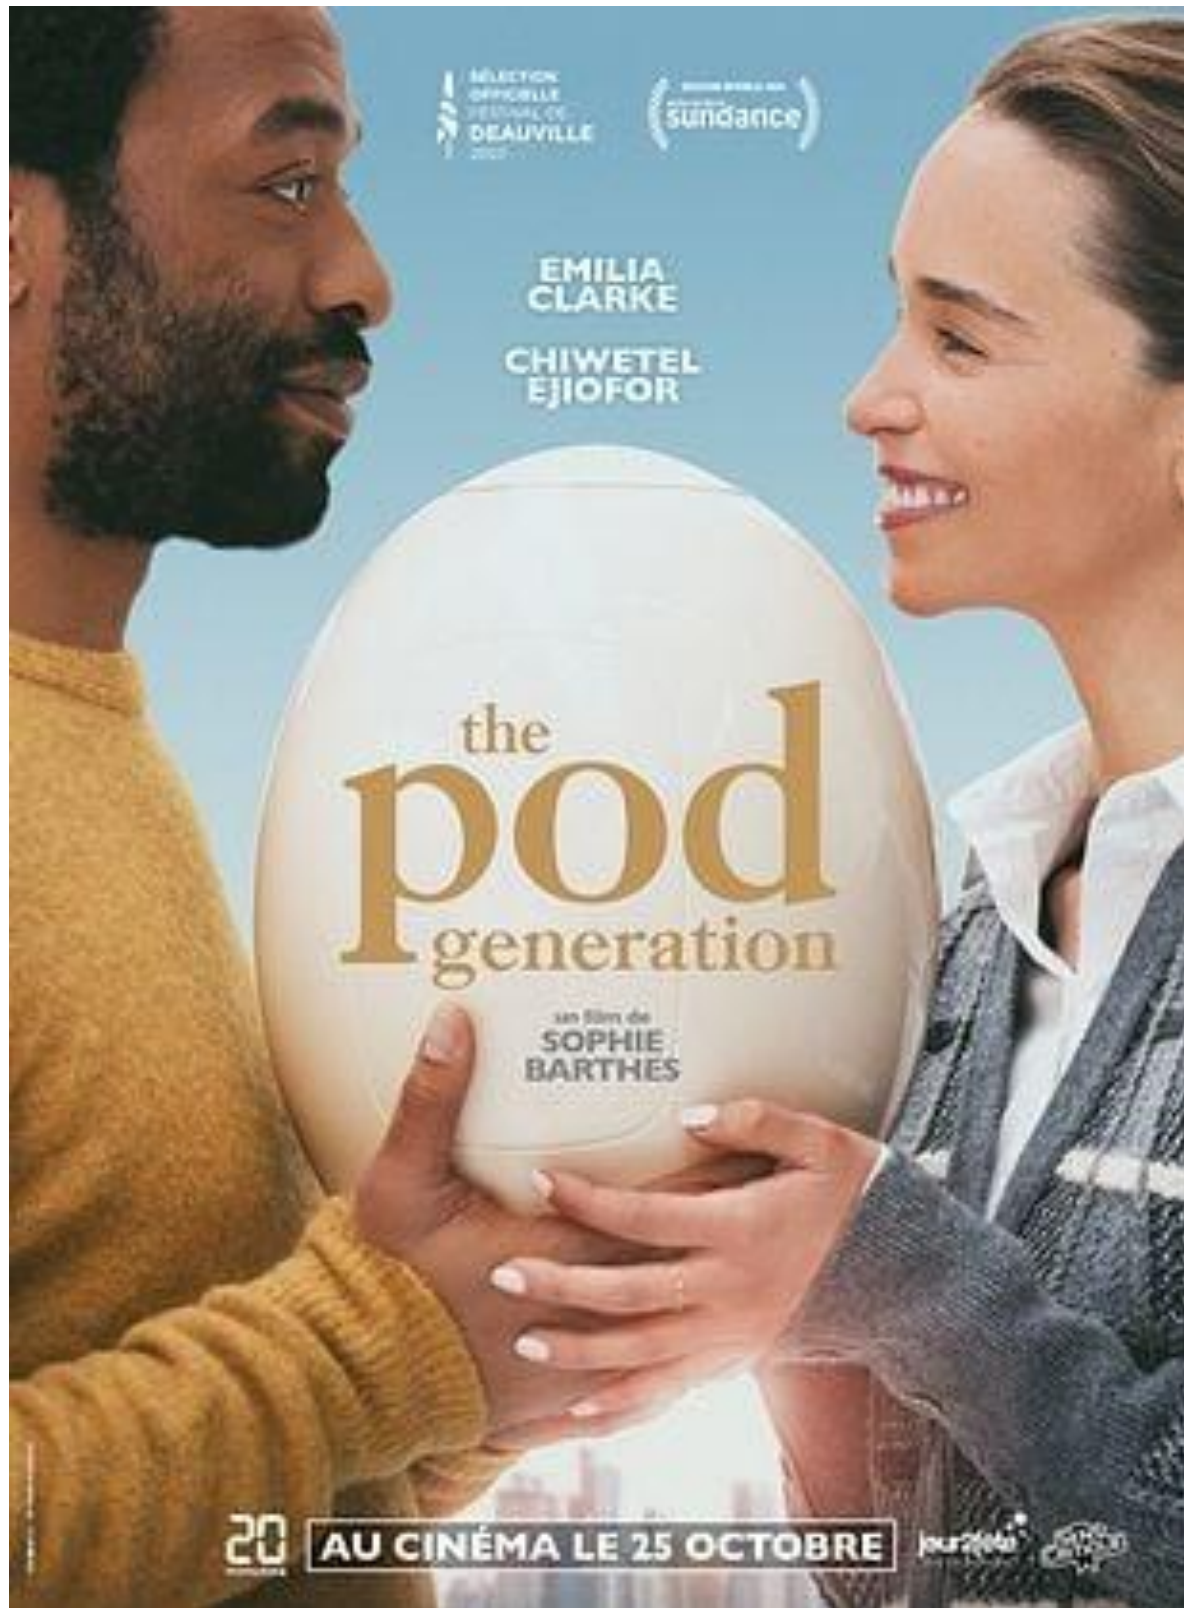

AI Ambassador – Osez l'IA

Vice-President ClusterIA

Mediterranean AI Expert - Education

EX CEO Maison de l'Intelligence Artificielle

# Film & Debate: The Pod Generation

High School • Université Côte d'Azur - Science & Society Service

## The Activity

AI-related film screening +  
collective debate

## Learning Objectives

- Distinguish between fictional AI and real-world applications
- Explore social representations and cultural perceptions of AI
- Place of AI in society
- Develop critical thinking

# Make Music with AI

Ville de Vence Festival Nuits du Sud • Maison de l'Intelligence Artificielle

## The activity

Make your own music and take it with you

## Learning Objectives

- How AI composes (patterns, training, styles)
- Human creative direction
- Limits of generative music
- Understanding the process through listening

"When you make music with AI, you don't just hear the technology—you understand it."

# Prompt Art Challenge

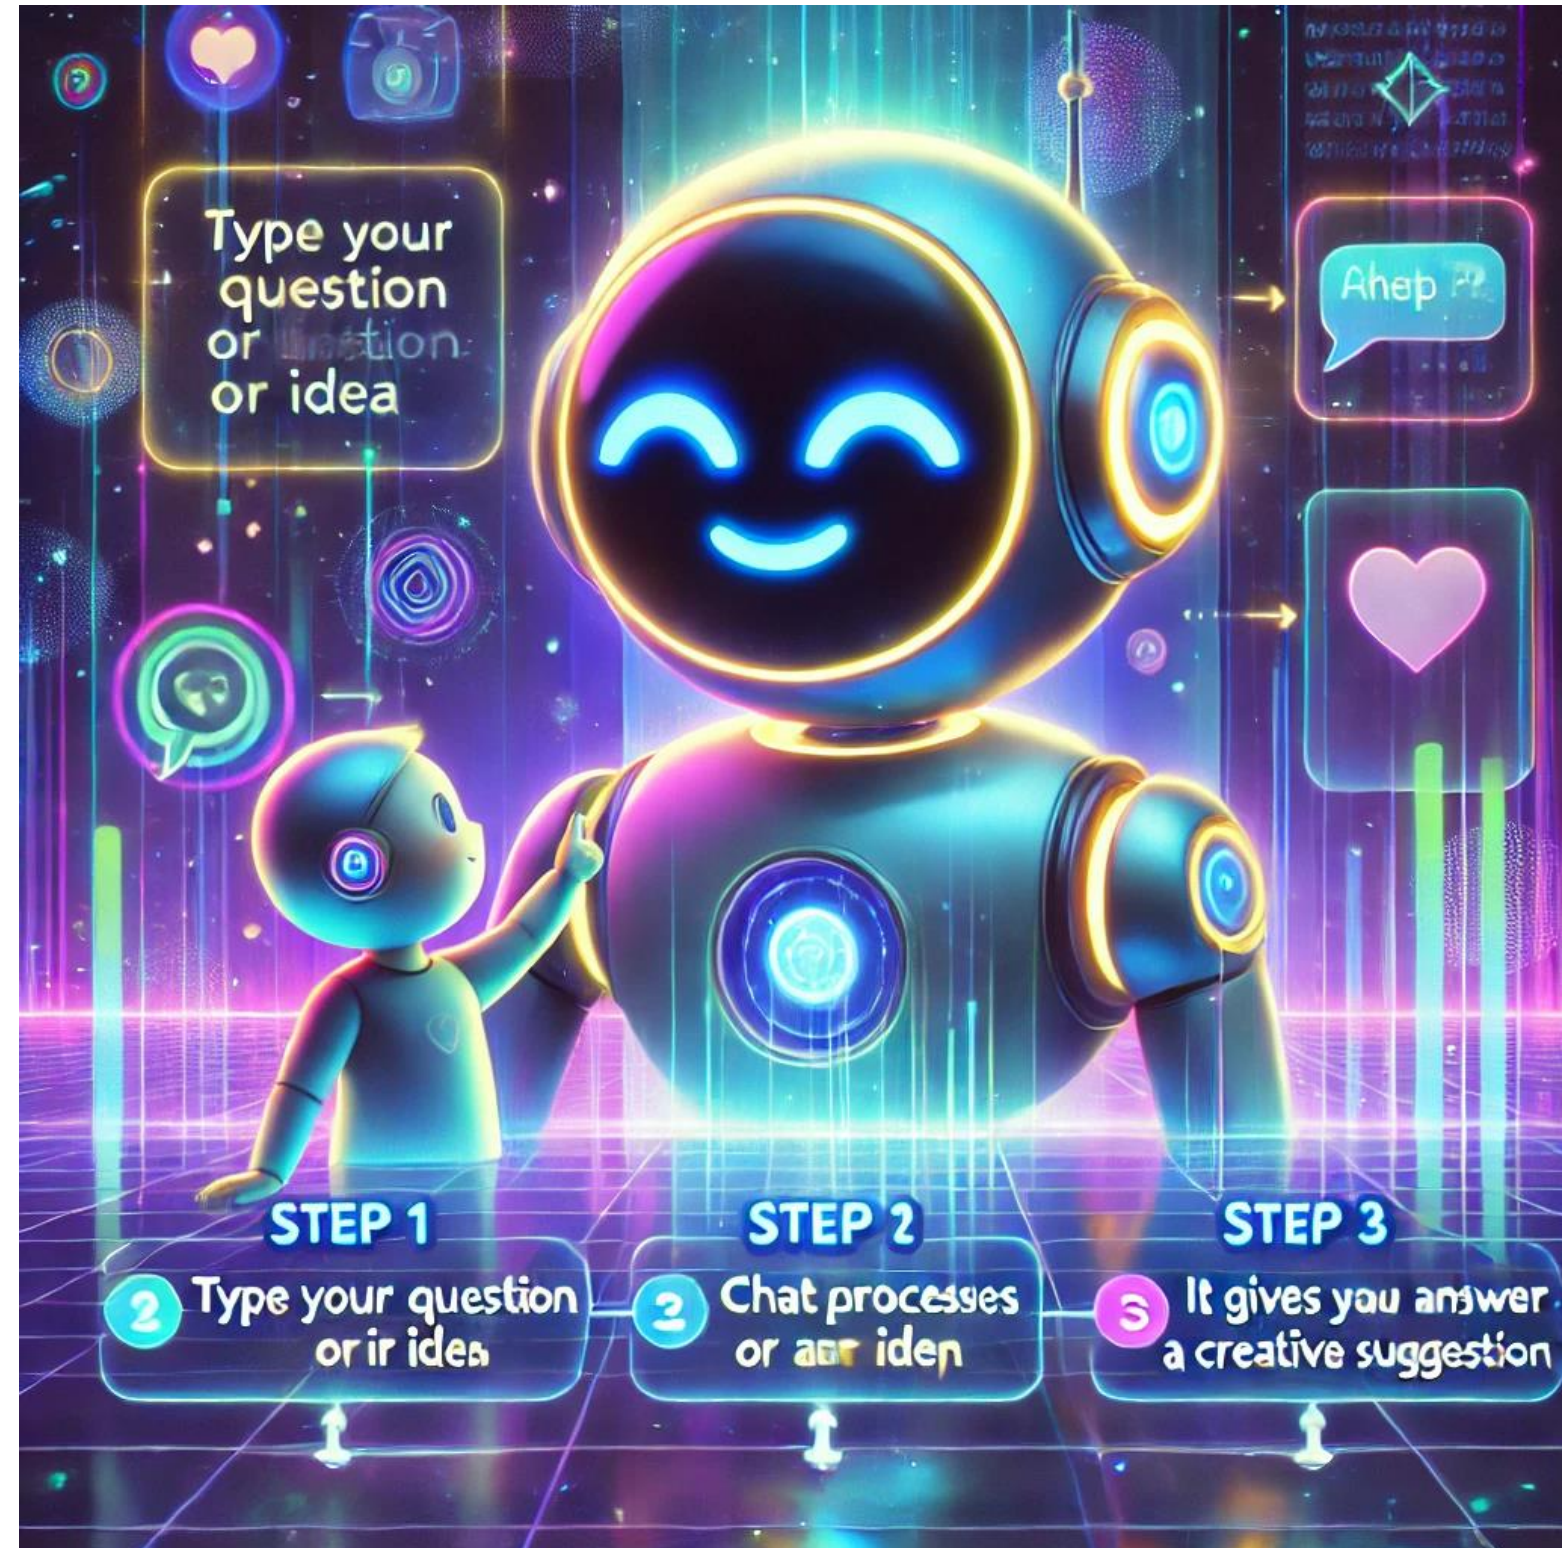

Rectorat des Alpes Maritimes •  
Maison de l'Intelligence Artificielle

## The activity

How to draw with AI

## Learning Objectives

- Make AI understandable
- What is a prompt?
- How generative AI works
- AI's limits
- Human-AI interactivity
- Becoming an active user

# Mister Love AI: When Artist Meets Algorithm

Collaboration: Street Artist Faben x Maison de l'Intelligence Artificielle

## The Exploration

What happens when a renowned street artist collaborates with AI?

**The Result:** A robot trained to paint in Faben's distinctive style on demand

## Learning Objectives:

- What can an artist do with AI?
- Exploring AI in street art
- Authenticity vs. artificial
- Role and place of AI in creativity & society
- Limits of the technology

# Slam Writing with AI

Middle School • Organized with Dowell

## The activity

How to write a good slam with AI

## Learning Objectives

- How AI learns ?
- Understanding AI outputs & limits
- Human-AI complementarity
- Human value
- Becoming an active user

# Culture & Art as Gateways to AI Literacy

Make technology accessible

Make AI understandable

Address risks & acceptability

Encourage critical thinking

Support active users

Explore impact on human creativity  
& future work

**Merci  
pour votre attention**

Art is the shortest path to understanding AI,  
because it lets us feel before we fear.
